777 North Capitol Street NE Suite 500 Washington, DC 20002 icma.org • 800-745-8780

Summary

The National Citizen Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. The NCS captures residents' opinions within the three pillars of a community (Community Characteristics, Governance and Participation) across eight central facets of community (Safety, Mobility, Natural Environment, Built Environment, Economy, Recreation and Wellness, Education and Enrichment and Community Engagement). This report summarizes Boulder's performance in the eight facets of community livability with the "General" rating as a summary of results from the overarching questions not shown within any of the eight facets. The "Overall" represents the community pillar in its entirety (the eight facets and general).

By summarizing resident ratings across the eight facets and three pillars of a livable community, a picture of Boulder's community livability emerges. Below, the color of each community facet summarizes how residents rated each of the pillars that support it – Community Characteristics, Governance and Participation. When most ratings were higher than the benchmark, the color is the darkest shade; when most ratings were lower than the benchmark, the color is the lightest shade. A mix of ratings (higher and lower than the benchmark) results in a color between the extremes.

Broadly, Boulder residents tended to give positive ratings to most aspects of community livability. Within the pillar of Community Characteristics, ratings within the facets of Natural Environment, Economy and Education and Enrichment tended to be higher than ratings in comparison communities. Governance ratings tended to be higher within the facets of Natural Environment and Recreation and Wellness. Mobility rates were higher than other communities within the pillar of Participation.

Figure 1: Dashboard Summarv

	Community Characteristics			Governance			Participation
